## **DETAILED ACTION**

In view of the Appeal Brief filed on 11/5/2008, PROSECUTION IS HEREBY REOPENED. A new grounds of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 5, 6, 24 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the claims refer to "said torque" without clarifying if the torque is the torque of the balloon or the torque of the inner shaft.

## Claim Objections

2. Claims 2 is objected to because of the following informalities: the wording of the claim: "with a catheter assembly said inner shaft" and "said balloon is secured to" is confusing. Examiner suggests

Application/Control Number: 10/663,641 Page 3

Art Unit: 3767

modifying the claim to read "with a catheter assembly, said inner shaft" and "said balloon being secured

to." Appropriate correction is required.

3. Claims 35 is objected to because of the following informalities: the wording of the claim:

"wherein said balloon having a torque" is confusing.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis

for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-6, 8, 10-25, 27-33, 35-37, 39-50 and 52 are rejected under 35 U.S.C. 102(b) as

being anticipated by Lombardi et al (US 4,362,150).

Lombardi et al disclose a device comprising a balloon (11) having a first and second unexpanded

state (Figure 1) and an expanded state (Figure 2); the balloon being mounted on the distal end of an inner

shaft (15) of a catheter, the inner shaft and the balloon in the first and second unexpanded states having a

torque (column 2, lines 37-51); an outer shaft (15) to which the inner shaft is tacked at a proximal end; the

inner shaft having a torque in a second unexpanded state of the balloon (torque of shaft (15) is provided

by turning threads (38) along grooves (32) and thus retains a torque even in the expanded position as

threads are still engaged with grooves); wherein the balloon is rotated about 30 degrees along the y-axis

in the first unexpanded state (Figure 2); the device material comprising a urethane copolymer (column 4,

lines 48-50).

Claim Rejections - 35 USC § 103

Application/Control Number: 10/663,641 Page 4

Art Unit: 3767

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

4. Claims 9 and 51 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lombardi et al as

modified by Kletschlka (US 6,443,926).

Lombardi et al disclose the claimed invention except for the device comprising a stent. Kletschlka

disclose in column 8, lines 1-4 that it is known to use a stent in this type of medical device. It would have

been obvious to one having ordinary skill in the art to modify the device of Lombardi et al with a stent as

taught by Kletschlka, since such a modification would allow the device to be used in stent therapy

procedures which are commonly used to treat patients.

Allowable Subject Matter

5. Claims 7, 26 and 38 are objected to as being dependent upon a rejected base claim, but would be

allowable if rewritten in independent form including all of the limitations of the base claim and any

intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of

the new ground(s) of rejection.

Conclusion

Application/Control Number: 10/663,641

Art Unit: 3767

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to CATHERINE N. WITCZAK whose telephone number is (571)272-7179. The examiner

can normally be reached on Monday through Friday, 8-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin

Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained

from either Private PAIR or Public PAIR. Status information for unpublished applications is available

through Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer

Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR

CANADA) or 571-272-1000.
